

DISCO Medi P20

Tricycle for seniors and disabled

Disco Medi with P20 front motor is the alternative to our model with Shimano Steps central motor. The system is ideal for retrofitting of the motor or for those who need to be able to control the speed using a throttle. We recommend this model for people with a maximum height of approx. 165 cm

DISCO Medi P20 is equipped with a speed sensor that ensures that the motor only works when you pedal - the so-called pedelec principle. So, you have to work before you can relax. The motor power is controlled at 5 levels and switches itself off at max 25 km/h. The tricycle has start-up assistance of up to 6 km/h.

The driving distance of a fully charged battery is up to 35 km. The more you help out and at favourable wind and road conditions, you can increase your driving distance to an even higher range.

DISCO Medi P20 is especially known for its comfort, durability and formidable roadability:

- » Powerful and almost silent electric motor activated by the pedals
- » Smart LCD display and removable Li/ion battery (11 Ah or 15.6 Ah)
- » Easy to get on and off and safe to drive
- » Comfortable sofa seat which is easily adjusted forwards and backwards
- » Extremely strong construction and a long working life (+10 years)
- » 7 gears with/without reverse function
- » We tailor the tricycle to your specific needs and deliver it within 15 business days

Specifications

Dimensions

Length: 171 cm
Width: 68 cm
Entry height: 25 cm
Wheel size: 16"

Bicycle weight

40 kg

User measures

Min. measure inside leg: 45 cm

User weight

Max 125 kg
